

Acme Corp - Employee Remote Work & Equipment Policy

1. Eligibility Guidelines

All full-time engineering, product, and design employees at Acme Corp are eligible for a hybrid or fully remote work arrangement, subject to manager approval. Employees must reside in a state or country where Acme Corp is registered as an employer. Fully remote employees are expected to maintain a stable broadband internet connection and a quiet working space suitable for video conferencing.

2. Equipment Stipend & Allowances

To support remote employees in setting up an ergonomic and productive home office, Acme Corp provides a one-time equipment stipend of up to \$1,000. This stipend can be claimed via the Expensify portal within the first 90 days of employment. Approved items include ergonomic office chairs, desks (including standing desks), external computer monitors, keyboards, mice, and webcams. Computing hardware (laptops) is provided directly by the IT department and does not count towards the \$1,000 stipend limit.

3. Core Collaboration Hours

To facilitate communication across different time zones, Acme Corp has established core collaboration hours from 10:00 AM to 3:00 PM Eastern Standard Time (EST) / 7:00 AM to 12:00 PM Pacific Standard Time (PST). All remote employees are expected to be online and responsive on Slack and email during these core hours. Recurring team syncs, design reviews, and sprint planning sessions should be scheduled within this time block.

4. Attendance & Offsites

Remote employees are requested to attend the company's bi-annual in-person engineering offsite events. These events are typically held in June and January and last for four days. All travel expenses, lodging, and meals for official offsites are fully paid by the company in accordance with the corporate travel policy.
